## DETAILED ACTION

### ***Allowable Subject Matter***

1. Claims 1-3 and 12 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter: The prior art considered does not disclose nor clearly suggest, the correction of phase errors in MRI of high resolution data frames, by using a convolution in k-space with low resolution phase reference navigators as claimed.

### ***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:  

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
4. Claims 4-11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims at issue contain inconsistencies in the mathematical description of the inventive steps. In claim 4 for example “d” in line 1 should be boldfaced for consistency with “**d**” in line 2, which represents a matrix. The definition of matrix **R** is also unclear. Step (h) in claim 7 refers to an accumulating sum in step (1) where such step is not previously recited. Note that parenthetical matter, such as that pertaining to the initialization of a matrix, carries no patentable weight and should not be relied on for completeness or clarity in claim recitations. The recitation “phase reference navigator” was probably intended on the last line of claim 9. Applicant is urged to carefully review the recitations of the claims at issue to cure all descriptive errors.

Art Unit: 2859

5. Claims 4-11 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Derbyshire, Du et al. Heid and Gupta et al. disclose methods for phase correction in MRI. Note the abstract of each disclosure.
